Subject: 30% Post Consumer Recycled Fiber Content Product Certification

Dear Mr. Johnston,

I am writing in response to your recent request regarding certification for post consumer recycle fiber content in Boise's 30% RC 50#, 60# and 70# Smooth and Vellum Offset.

Boise hereby certifies that the recycled fiber content of Boise's 30% RC 50#, 60# and 70# Smooth and Vellum Offset, manufactured at our St. Helens mill is 30%. Our fiber furnish includes a minimum of 30% "post consumer" recovered materials as defined in the *EPA Paper Products Recovered Materials Advisory Notice* (61FR 26986, May 29, 1996). This product meets the *Federal Printing and Writing Paper Specifications* as outlined in Executive Order 12873, dated October 20, 1993, and the Amended Executive Order, dated March 25, 1996.

We thank you for your ongoing interest in Boise and Boise's paper products. This certification shall be valid for one year from the date hereof.

Sincerely,

A handwritten signature in black ink that reads "Jon A. Saatvedt". The signature is written in a cursive style with a large, sweeping initial "J".
